

## **PUBLIC ACCESS POLICY**

### **May 2012**

The Lymphoma Research Foundation (LRF) funds biomedical research in order to better understand the causes of lymphoma and to advance its prevention, treatment, and cure. The main output of this research is new knowledge. To ensure this knowledge can be accessed, read, applied, and built upon in fulfillment of our goals, LRF expects its researchers to publish their findings in peer-reviewed journals.

In addition, it is a condition of LRF funding that all peer reviewed articles supported in whole or in part by its grants must be made available in the PubMed Central online archive in accordance with the following conditions:

Authors are to deposit an electronic copy of their final peer-reviewed manuscripts in PubMed Central immediately upon acceptance for journal publication.

The manuscript is to be made publicly available in PubMed Central no later than 12 months after the official date of journal publication. This requirement applies to all LRF grants awarded after May 1, 2012.

PubMed Central is a database of full-text biomedical journal articles available online without a fee. It is hosted by the National Library of Medicine in the National Institutes of Health. Once posted in PubMed Central, results of research become more accessible, prominent, and integrated within the context of other research findings, making it easier for scientists worldwide to pursue lymphoma research. Equally important, families, clinicians, patients, educators, funders, and students reap the benefits of information arising from funding by accessing publications on PubMed Central at no charge.

An author must acknowledge Lymphoma Research Foundation support in every article arising from such funding. The acknowledgement statement must include the applicable LRF grant number. This will enable LRF to link the published outputs of research to the support it has provided.
